Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II, method claims 23-35 in the reply filed on 01/29/2010 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 23-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Heisler et al. (US 6419684).

Note in figures 8-11 of Heisler et al., a cutting device that capable of cutting a strip of tissue of width W from a tissue mass, comprises the steps of: providing an elongate cutting tube (304) having a lumen that opens through an opening in its distal end; a protruding tip (333); first and second cutting edges (340,342,350) formed on generally opposite edges of the distal end of the cutting tube (304); wherein the first and second cutting edges (340,342,350) being separated by a distance D (located at 330,354) that is approximately equal to the width W of the strip of tissue to be cut; advancing the distal end of the cutting tube (304) through the mass of tissue such that the first and second cutting edges

(340,342,350) cut a strip of tissue of approximate width W; wherein the strip of tissue can be removed for a diagnostic or therapeutic purpose; wherein the cutting device can be used in the anterior chamber of the eye; positioning the distal end of the cutting tube adjacent to or within the trabecular meshwork of the eye; and advancing the cutting tube such that the cutting edges cut a strip of approximate width W from the trabecular meshwork; wherein the cutting device can also be use for severing the strip of tissue after the strip of tissue has reached a desired length and removing the strip of tissue through the lumen of the cutting tube (304); and wherein the cutting device appears having a second lumen.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Swaim (US 5807277) discloses a cutting device for a sample of body tissue. Baxter et al. (US 6428539) discloses a cutting tool. Pascaloff (US 5112299) discloses an arthroscopic surgery instrument with cutting edges. Shimomura et al. (US 5123904) discloses a surgical resecting instrument.
